ADVANCED STEM CELL TECHNOLOGIES

Collecting stem cells during spaying/neutering is the means for life changing preventative care.

Performed in conjunction with a spay/neuter, collecting your pet's stem cells early will

- Maximize the dosage & effectiveness
- Reduce complications associated with anesthesia
- Increase cell yields

Most dogs & cats suffer from diseases & ailments later in life...

- Arthritis (25-30%)
- Hip dysplasia
- Joint cartilage damage
- Ligament damage
- Tendon damage

Future treatments...

- IBD
- Renal failure
- Autoimmune disease
- Ocular disease
- Atopy
- Degenerative myelopathy

Treat the CAUSE, not the SYMPTOMS with MediVet Stem Cell Therapy.

MediVet Stem Cell Therapy provides an all-natural, affordable, and hassle-free solution that will ensure your pet's future health and quality of life.

Compared to the options of invasive surgery or expensive long-term drugs, stem cell therapy is the most logical choice.

| | Stem Cells | Surgery | Drugs |
|---------------------|------------|---------|-------|
| All natural | ✓ | | |
| Non-invasive | ✓ | | ✓ |

“The fact that we have regenerative medicine and not just ‘band-aid’ medicine is a veterinarian’s dream.”

—Dr. Sherri Russell

“This is going to do for the medical industry what the Industrial Revolution did 100 years ago, it’s just going to change medicine altogether.”

—Dr. Dena Fitzpatrick
