

## Emergency Equipment for a Crash Cart

- Endotracheal tubes: # 3, 5, 8, 10, 14, with cuff-inflating syringes already attached.
- Laryngoscope: large and small blades
- Emergency drugs: epinephrine, atropine, vasopressin, lidocaine, and assorted syringes (1-, 3-, 6-, 12-cc) with needles attached. We have premade 1ml and 3ml syringes of epinephrine and atropine.
- Surgical scrub and taping material: for IV catheter placement and surgical procedures
  
- Drug administration: IV catheters: 14, 16, 18, 20, 24 gauge, intraosseous catheters, central venous catheters, polypropylene tubes (for intratracheal administration of drugs)
- Chest tap setup: 2.0"- 18 and 20 catheters, 3-way stop cock, extension set, 60 cc syringe
- Minor surgical pack: to include instruments for emergent tracheostomy and chest tube placement
- ECG, Blood pressure with multiple cuff sizes
- Pulse oximetry, End tidal CO<sub>2</sub>
- Defibrillator
- Suction apparatus
- Oxygen supply dedicated to area
