The VMCLI Critical Care Department provides initial stabilization and advanced life support of critically ill and injured patients. In addition to providing state of the art emergency care, the Critical Care Service works in conjunction with each specialty service at the VMCLI to provide peri-surgical and anesthetic support, as well as consultation for all hospitalized patients. Benefits include state-of-the-art continuous hemodynamic monitoring, blood pressure support, fluid therapy, transfusion medicine, and advanced pain management and relief. In addition, nutritional consultations and implementation of personalized nutritional plans will be available to support all critically ill patients to optimize their recovery.

Critical Care Services Available at the Veterinary Medical Center of Long Island:

- Consultation, diagnostic evaluation & treatment of critically ill or injured patients
- Pediatric and geriatric intensive care
- Advanced IV fluid and electrolyte therapy
- Mechanical ventilation & supportive care
- Telemetric monitoring of ECG
- Cross-matching & blood transfusion medicine
- Peritoneal & pleural dialysis for toxin removal or renal failure
- Total & partial parenteral (intravenous) nutrition for patients unable to eat
- Feeding tube placement for enteral nutrition
- Balanced analgesia for trauma patients

The Critical Care team happily accommodates emergency referrals during and after office hours. Alternatively, your patient can be admitted through the emergency service, 24 hours a day, 365 days a year for stabilization and transfer to any of our experienced & dedicated specialty services.
